

TAILINGS AND HYDRAULIC FACILITIES MANAGEMENT POLICY

In order to manage tailings and hydraulic facilities in a competent, socially and environmentally responsible way the Company designs, constructs, operates, decommissions and closes hydraulic facilities ensuring that:

- approaches of tailings and hydraulic facilities management comply with regulatory requirements and corporate standards;
- local communities are informed and consulted to ensure continuous improvement of tailings and hydraulic facilities management;
- structures are stable and safe;
- effective measures are in place to prepare for emergencies and response to them;
- solids and waters are disposed and managed in compliance with applicable environmental law requirements;
- employees engaged in tailings and hydraulic facilities operation continuously improve their competencies and professional skills;
- all above principles are applied for employees of relevant contractors.
